Over 2000 gallons of trash collected as part of The Great Global Cleanup

(ALBUQUERQUE, N.M.) – As part of Earth Day and Earth Month, PNM joined forces with EarthDay.org in a worldwide effort called “The Great Global Cleanup,” in which millions of people and communities around the world cleaned up their corner of the earth. PNM was the only utility to participate in the Great Global Cleanup.

As part of its involvement, PNM asked its employees and the community-at-large to participate in small group cleanups, individual cleanups, or “plogging,” which is picking up trash while jogging.

Throughout the month of April, PNM Resources employees and customers participated in 21 cleanups with many of the cleanups taking place in Albuquerque and Santa Fe. Over 80 people participated in the cleanups. As a result, over 90 bags of trash were collected, totaling an estimated 2200 gallons of trash!

“The pandemic has impacted communities in many ways, including the upsurge of waste due to the disposable products. This was our way of helping alleviate this problem. Together, I believe we all made a difference in our corner of the earth,” says Pat Vincent-Collawn, President, CEO Chairman, of PNM.

can continue to restore our earth!

Although Earth Day and Earth Month are over, PNM is encouraging its employees and customers to continue these efforts going forward. Together, we

About PNM

With headquarters in Albuquerque, PNM is the largest electricity provider in New Mexico, serving over 530,000 customers in dozens of communities across the state. PNM is a subsidiary of PNM Resources, an energy holding company also headquartered in Albuquerque. For more information, visit PNM.com.
